PROFESSIONAL SUMMARY

Detail-oriented Computer Science graduate with 5 years of rigorous on-ground diagnostic and system troubleshooting experience, specializing in AWS/Azure cloud infrastructure automation. Proven technical capacity in architecting secure multi-tier networks, orchestrating containerized microservices, and deploying automated CI/CD pipelines through award-winning project engineering. Possesses direct professional and academic exposure within the ASEAN market (Singapore and Malaysia), establishing exceptional intercultural communication and a disciplined, root-cause-oriented approach to resolving complex infrastructure incident matrices. Ready to deliver immediate technical and operational value to enterprise DevOps pipelines.

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, S3, VPC, RDS, IAM, CloudWatch - SAA-C03 Candidate), Azure (Container Apps)
DevOps & Tools: Docker, Linux (Ubuntu), Bash Scripting, Git, GitHub Actions, Terraform (IaC)
Programming: Python, FastAPI, SQL, Java, C++

KEY PROJECTS & AWARDS

AI-Driven Supplier Risk Management Platform ("SmartChain")

Sep 2025 – Mar 2026

KT Aivle School (Grand Prize Capstone Project)

Seoul, South Korea

- **Grand Prize (2nd Place Nationwide)** among competitive technology cohorts and received the **Leadership Award** for outstanding engineering governance and end-to-end infrastructure delivery.
- Served as **Infrastructure Leader**, architecting and provisioning a resilient multi-tier cloud topology on Azure Container Apps that integrated a React 18 frontend, Spring Boot 3.2 backend, PostgreSQL 16 database, and high-throughput FastAPI AI nodes.
- Engineered automated **CI/CD pipelines via GitHub Actions**, establishing zero-secret infrastructure environments utilizing Azure Key Vault and secure object storage tiers via Azure Blob Storage.
- Designed enterprise-grade secure networking layers, structuring isolated virtual networks, custom subnets, and routing protocols to safely handle intensive multimodal AI workloads (Clova OCR, GPT-5.1 Vision, YOLO26n).
- Formulated an infrastructure capable of managing compliance verification for **3,354 target suppliers**, successfully reducing manual verification lead times by **90% (from 2 days down to 30 minutes)** while achieving a **95%+ automated data consistency guarantee**.

PROFESSIONAL EXPERIENCE

Sihwa Car Center

Sep 2022 – Present

Lead Systems Technician & Troubleshooter

Siheung, South Korea

- Diagnosed, isolated, and resolved complex electrical, mechanical, and sensor-driven electronic fault matrices across 1,000+ vehicles using advanced diagnostic telemetry and telemetry data analysis.
- Developed a highly structured root-cause analysis framework to handle system dependencies, directly mapping physical system troubleshooting principles to software and cloud infrastructure debugging logic.
- Optimized on-ground workshop dispatch operations and asset tracking, decreasing average diagnostic latency by 15%.

IMACADEMY

Jul 2025 – Aug 2025

IT Infrastructure & Operations Intern

Kuala Lumpur, Malaysia

- Assisted in enterprise IT resource provisioning, internal network setups, and staging software configurations.
- Collaborated within a multicultural, agile development environment to audit and optimize user management workflows.

Nike

Sep 2021 – Sep 2022

Retail Operations Specialist

Seoul, South Korea

- Managed complex inventory data tracking and high-volume supply chain logistics under strict corporate guidelines.

PMP Language Academy
Administrative & Communications Coordinator
• Coordinated cross-functional workflows, data archiving, and bilingual client communications in a fast-paced environment.

Sep 2019 – Sep 2021
Seoul, South Korea

EDUCATION

Konkuk University
Bachelor of Science in Computer Science
• Key Focus: Cloud Computing, Data Structures & Algorithms, Network Architecture, Systems Troubleshooting.

Feb 2019 – Feb 2026
Seoul, South Korea

PSB Academy
Academic Exchange Program
• Engaged in multicultural business communication, building deep contextual familiarity with Singapore's professional landscape.

Jul 2024 – Aug 2024
Singapore
